composition of generating functions, trees, algebraic generating functions, D-finite generating functions, noncommutative generating functions, and symmetric functions. Mon, 05 Nov 2018 12:42:00 GMT Enumerative Combinatorics: Volume 2 (ebook) by Richard P ... - This is an excellent book on combinatorics, but it is quite difficult to understand--written for experts, not novices. The author often chooses a more general framework in which to present things, and this can make the material quite difficult to follow. Tue, 06 Nov 2018 20:40:00 GMT Amazon.com: Customer reviews: Enumerative Combinatorics ... - Example 1.2 For the Prüfer code $(2;4;7;0;2;5)$, we have $h=(0;2;6;5;5;7;4)$ and hence $r(h)=(1;0;1;0;1;2;1;1)$. The sequence $R(h)$ is given by $(0; 1; 1; 2; 2; 1; 1; 1)$, where the minimal value of $R_j(h)$ is reached at $R_3(h) = R_4(h) = 2$. The smallest index d is 3. Hence we have a $1 = n - 3 = 4$ which recovers the parking function $(4;6;2;1;1;3;0)$. Sat, 20 Oct 2018 16:07:00 GMT Edited by Miklos Bóna - Texas A&M University - The point is that Volume 1, originally published in 1986, needed spiffing up, while Volume 2, born in 1999, does not. Given that, let me just point you to our review of volume 1 and add only that this is the real thing, a book universally considered the gold
