Sat, 10 Nov 2018 02:13:00 GMT Fundamentals of Cutting - IITK - Machining traditionally takes place on lathes, drill presses, and milling machines with the use of various cutting tools. Successful machining also requires knowledge about the material being cut. This course is designed in such way that it explains all aspects (process and tools) of metal cutting. Thu, 08 Nov 2018 21:21:00 GMT Metal Cutting and Tool Design - PDF Free Download - THEORY OF METAL MACHINING • Overview of Machining Technology • Theory of Chip Formation in Metal Machining • Force Relationships and the Merchant Equation • Power and Energy Relationships in Machining • Cutting Temperature ... in metal cutting: (b) forces acting on the Wed, 07 Nov 2018 15:10:00 GMT

THEORY OF METAL MACHINING - Common cutting processes include sawing, shaping (or planing), broaching, drilling, grinding, turning and milling. Although the actual machines, tools and processes for cutting look very different from each other, the basic mechanism for causing the fracture can be understood by just a simple model called for orthogonal cutting.
